Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

NOTIFICATION

Calcutta, the 13th September 1958

Special Notice

The following Group of Abridgments of Patent Specifications has been published and copies thereof are available for sale with the Manager of Publications, Civil Lines, Delhi at Re. 1 per copy.

Copies are also available for sale at the Counter of the Government of India Book Depot, 8, Hastings Street, Calcutta, on cash payment.

Group LXII
(Containing Abridgments of
Patent Specifications be-
tween Nos. 30,001 and
35,000).

Wireless signalling and
controlling.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

The 28th August 1958

65084. Automatic Telephone and Electric Company Limited. Improvements in automatic and semi-automatic telephone systems employing voice frequency signals. (3rd September 1957).

65085. Automatic Telephone and Electric Company Limited. Improvements in dial switches for use with coin-box telephone instruments. (18th September 1957).

65086. The Upjohn Company. Organic compounds and process.

65087. A. M. Morris. Knowledge teaching aid.

The 29th August 1958

65088. The Electric Storage Battery Company. Improvements in or relating to storage batteries.

65089. The British Petroleum Company Limited. New polyesters and their method of preparation. (30th August 1957).

65090. N. V. Industriële Onderneming W. H. Braskamp. Window or ring ventilator.

65091. N. V. Industriële Onderneming W. H. Braskamp. Locking and operating mechanism for a flap, shutter, window or similar device operated by means of a flexible pulling member.

65092. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to ceramic bodies more particularly for use as capacitor dielectrics.

65093. Deutsche Gold-Und Silber-Scheidanstalt Vormal's Roessler. Process for hot-formation of oxygen-sensitive metals and metallic alloys in particular.

The 30th August 1958

65094. R. Martiri. Gasifier case.

65095. Parke Davis and Company. Anthelmintic compounds and process for their production.

65096. Parke, Davis and Company. Amine salts and process for their production.

65097. Imperial Chemical Industries Limited. Production of organo-silanes. (13th September 1957).

65098. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Improvements in or relating to textile drafting mechanism.

The 1st September 1958

65099. M. A. Chaudary. Improvement in and relating to generation of energy.

65100. C. A. Anvindyamanik and Lakhi Trading Co. Improvements in or relating to locking arrangement of food carriers.

65101. Imperial Chemical Industries Limited. Improvements in or relating to cyclones. (6th September 1957).

65102. Imperial Chemical Industries Limited. Films of synthetic polymer. (11th September 1957).

65103. Imperial Chemical Industries Limited. Synthetic polymer films. (11th September 1957).

65104. Imperial Chemical Industries Limited. New Dye-stuffs. (4th October 1957).

65105. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Production of beta-ionylidene-ethyl-triaryl phosphonium halides.

65106. Ciba Limited. New unsaturated aliphatic amino-diols and process for their manufacture.

65107. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Indole-quinolizine derivatives and process for the manufacture thereof. (5th March 1958).

65108. Ciba Limited. New biguanides and process for their manufacture.

65109. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Production of compounds of the beta-ionylidene-ethylidene series.

The 2nd September 1958

65110. INVENTA A. G. für Forschung und Patentverwertung. Process for the purification of crude sugar solutions.

65111. S. Sumiya. Improvements in or relating to froth flotation system.

65112. Glaxo Laboratories Limited. Improvements in or relating to antibiotics. (20th September 1957).

65113. Carrier Corporation. Purge recovery arrangement for refrigeration systems.

65114. Union Carbide Corporation. Free-peeling submerged arc welding composition.

65115. Merck & Co., Inc. Chemical compounds and processes for preparing the same. (9th May 1955).
65116. Caterpillar Tractor Co. Hydraulic control valve throttling mechanism.
65117. D. Napier & Son Limited. Turbine casing.
65118. The British Tabulating Machine Company Limited. Improvements in or relating to signal translating apparatus. (5th March 1956). [Divisional date 2nd March 1957].
65119. Siemens and Halske Aktiengesellschaft. Improvements in or relating to arrangements for correcting distortion in start-stop telecommunication systems. (3rd April 1958).
65120. Siemens and Halske Aktiengesellschaft. Improvements in or relating to protective systems for telecommunication lines.
65121. General Electric Company. Improvements in or relating to "Stator Vane Half Ring Assemblies".
65122. J. M. Huber Corporation. Process and apparatus for making carbon black.
65123. Libbey-Owens-Ford Glass Company. Method and apparatus for bending glass sheets.
65124. Ciba Limited. Process for the manufacture of coloured derivatives of polyhydroxylated substances of high molecular weight.
65125. The Lummus Company. Process and apparatus for manufacturing mixed fertilizers.

The 3rd September 1958

65126. R. D. Gorozpe. Extruding apparatus for preparing a quick-cooking food product. [Divisional date 10th September 1957].
65127. J. L. C. Andrianne. Rail. (4th November 1957).
65128. E. I. Du Pont De Nemours and Company. Polymerization of formaldehyde.
65129. Tecalemit Limited. Improvements in bonding means for filter elements.
65130. The English Electric Company Limited. Improvements in and relating to magnetic amplifier controlled systems. (11th September 1957).
65131. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to low-pressure mercury vapour discharge tubes. [Addition to No. 63469].
65132. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to variable electric impedances, more particularly variable resistances.
65133. G. M. Adie. Constructional elements.
65134. G. M. Adie. Constructional elements and materials therefor. (3rd September 1957).
65135. G. M. Adie. Constructional elements, materials and manufacture thereof. (3rd September 1957).
65136. G. M. Adie. Concrete and other structures. (3rd September 1957).
65137. Ciba Limited. Deodorizing preparations containing new pyridine carboxylic acid amides. [Divisional date 6th August 1957].
65138. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of garlic powder.

Alteration of Date

61624. The claim to priority date 7th September 1956 has been abandoned and the application dated as of 3rd September 1957, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 75-A of the Act.

59324. P. Runchhoddas. Improvements in or relating to spinning wheels. Accepted on 29th August 1958.

Drafting rollers are driven from the main driving shaft through a set of pinions and anti-ballooning guards are provided between the spindles.

59325. P. Runchhoddas. An improved drawing frame for manufacture of silver. Accepted on 29th August 1958.

Guide ring is adapted to move up and down within the rotating can.

59796. The Chairman, Indian Tea Association. Improvements in or relating to machines for processing tea leaf. Accepted on 30th August 1958.

Helical feed worm being adapted to feed the leaf into an annular space formed by the cylinder bore substantially cylindrical extension of the rotatable axial drive shaft.

59798. Harry Ferguson Research Limited. Improvements in internal combustion engines. (12th March 1956). Accepted on 30th August 1958.

With opposed horizontal cylinders with an intervening crank case with inverted U form through which the opposed cylinder open.

59824. PERFOGIT Societa per Azioni. Method for polymerizing olefines. Accepted on 3rd September 1958.

Reacting ethylene in presence of polymerisation catalyst comprising aromatic hydrocarbon and metals or metal compounds.

59827. United States Steel Corporation. Method and apparatus for indicating and controlling the rate of heating of a travelling strip. Accepted on 3rd September 1958.

Melting tin coating on steel strip electrically with means for applying voltage proportional to heating power, strip speed and thickness.

59837. Shri Ram Institute for Industrial Research. Improvements in or relating to shrink-proofing of wool and hair materials. Accepted on 3rd September 1958.

By impregnating the material with an oxidising agent and then passing it through fluidised bed of solid discrete particles maintained at an elevated temperature.

59848. Tecalemit Limited. Double-acting fluid injector. (9th March 1956). Accepted on 3rd September 1958.

A delivery or metering piston acts reciprocally in cylinder and valve control means for flow of oil thereinto.

59867. The British Tabulating Machine Company Limited. Improvements in or relating to apparatus for summing values in a non-decimal scale of notation. (6th April 1956). Accepted on 1st September 1958.

Including two value registering devices associated with each of which is a translating switch network and including switches settable by the other said device, and means for generating impulse under control of each said network and associated registering device, the two pulses together representing in decimal notation the value which is registered by said devices.

60007. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius and Burning. Halogenated bicyclo-[2.2.1]-heptenes and a process of preparing them. (12th July 1956). Accepted on 1st September 1958.

Reacting halogenated cyclopentadiene with cis-1:4-dihalogenobutene-(2).

60164. Johnson & Johnson. Improvements in or relating to adhesive bandage for surgical or other purposes. Accepted on 28th August 1958.
Extensible plastic backing having adsorbent pad to cover 0.4 square inch of skin surface, and plurality uniformly space openings.
60285. Phillips Petroleum Company. Process for production of solid ethylene polymers and polymers so produced. Accepted on 28th August 1958.
Contacting ethylene with chromium oxide catalyst in liquid hydrocarbon diluent at temperature where polymer formed is insoluble.
60332. N. J. A. Breach. An improved method of manufacturing copper oxychloride. Accepted on 28th August 1958.
By oxidation of copper in the presence of cupric chloride and a soluble chloride or an ammonium catalyst.
60520. Rohm & Haas Company. Preparation of isothiocyanatoethylimidazolidinethione and compositions made therefrom. Accepted on 2nd September 1958.
A soluble salt of β -[1-(2-thionoimidazolidyl)] ethyldithiocarbamic acid is reacted with an ester of chloroformic acid and the product is decomposed.
60532. Ciba Limited. 2-Imino-theazolidine-4-ones and process for their manufacture. Accepted on 2nd September 1958.
A thiourea is reacted with an acetic acid containing a reactive esterified hydroxy group in α -position or an ester thereof.
60638. J. P. Gupta. Improvements in or relating to sewing machines. Accepted on 28th August 1958.
Providing a cam on the bottom rotating driving shaft for imparting to the feed dog a forward and backward movement.
60669. The British Thomson-Houston Company Limited. Improvements in and relating to multi-contact electrical switch devices. (4th June 1956). Accepted on 2nd September 1958.
Of the kind comprising a plurality of contacts such as are adapted to be connected together in progressively in greater number upon movement of a movable contact.
30709. Imperial Chemical Industries Limited. Process for the manufacture of new salts of bis-biguanides. (6th June 1958). Accepted on 30th August 1958.
A polyhydroxy carboxylic acid or a salt thereof and a bisbiguanide are interacted.
30719. Ciba Limited. Manufacture of new tetrahydrodioxypyridazines. Accepted on 3rd September 1958.
A tetrahydropyridazine is reacted with an alcohol or a mercaptan; or an aryl 3: dioxo-1:2:3:6 tetrahydropyridazine is 2-alkylated.
30796. N. J. A. Breach. An improved method of manufacturing fungicidal ammonium copper oxychloride. Accepted on 1st September 1958.
Copper is reacted with an aqueous solution of NH_4Cl and oxygen in the presence of an alkali.
60836. Edibrac Limited. Improvements relating to cutting tools. (22nd June 1956). Accepted on 3rd September 1958.
Cutting tip is releasably clamped from below against a reference surface.
60977. Claude Paz Et Visseaux. Cold and hollow electrode for gaseous electric discharge lamps. [Addition to No. 56006]. Accepted on 3rd September 1958.
Having at least one small piece comprising one or more rare earth metals placed in the vicinity of the electrode which is farthest from the point at which the discharge leaves the electrode.
1023. Stamicarbon N. V. Process and apparatus for separating objects according to specific gravity. Accepted on 29th August 1958.
Pieces are supplied along a path, allow the pieces to pass, pieces discharged to different plants.
61105. Comerio Erocole S.P.A. A device for timing the printing rolls in rotary printing machines for fabrics or other articles in form of cloth or lamination. Accepted on 3rd September 1958.
Comprising a toothed wheel solidary with the printer cylinder, a worm and wheel coupling to determine relative rotation thereof.
61139. P. E. Bessiere. Improvements in reciprocating liquid pumps, and in particular in fuel injection pumps. Accepted on 3rd September 1958.
Comprising a movable member displaced by the pressure of the fuel delivered by the piston during its delivery stroke, against a return force exerted by a spring and means for braking the return of this member into its position of rest.
61398. Ciba Limited. New heterocyclic amidoximes. Accepted on 3rd September 1958.
By reacting compound of type hexamethyleneimino-propionitrile with hydroxylamine.
61422. Ciba Limited. Manufacture of 18-O-(acylamino-benzoyl)-reserpine acid esters and salts thereof. Accepted on 30th August 1958.
Esterifying methyl reserpate with benzoic acid substituted by acylamino group.
61445. Caterpillar Tractor Co. Hinge connections for tractor tracks. Accepted on 1st September 1958.
Comprising inner and outer sets of links having aligned bores, a bushing secured within the bores of the inner links with ends of the bushing extending outwardly.
61555. South African Iron and Steel Industrial Corporation Limited. Improvements in and relating to the production of coking pitch or coke from coal tar or coal tar products. Accepted on 2nd September 1958.
Distilling volatile products from coal tar until a coking pitch is obtained having the following properties.
Volatile matt—7–35 per cent.
Swelling Index—1–4½ per cent.
Stall Point 280–310°C.
61610. Chas. Pfizer & Co., Inc. Tetracycline process. Accepted on 3rd September 1958.
A chlortetracycline producing micro-organism of the genus streptomyces is fermented in the presence of 2-benzoxazolyl thio N-methyl carbamate, 2-chloro-benzoxazole and/or 2-chloro-benzothiazole, or 2, 6-dimercaptobenzodioxazole.
61624. C.A.V. Limited. Liquid fuel pumps for internal combustion engines. Accepted on 2nd September 1958.
Having combined with it an adjustable cam for actuating the injection pump, a spring for automatically advancing the cam.
61807. A. M. Goodfellow. Castor cups for receiving castors on the legs of furniture. Accepted on 30th August 1958.
A block with recess for accommodating the castor and grub screws for securing the edges of the block to the recess for securing the castor.
61869. Farbenfabriken Bayer Aktiengesellschaft. 5-Acyl-7-Secondary Aminomethyl-8-Quinolins. (24th June 1957). Accepted on 2nd September 1958.
A 5-acyl-8-quinolinol is reacted with H.CHO or para-formaldehyde and a primary amine containing 1 or 2 hydroxy groups and upto 4 carbon atoms.
61936. Wilmot-Breeden Limited. Improvements in or relating to latching mechanisms. (8th October 1956). Accepted on 3rd September 1958.
Latch member mounted for angular movement engages with a striker and is restrained from such angular movement by an actuating member when in latching position.

61963. F. Kocks. Improvements relating to the production of iron and steel from iron ore and furnace therefor. (11th September 1957). Accepted on 28th August 1958.

Ore with slag forming material delivered into carbon containing melt while being heated, carbon consumed during process is replenished by oil which is pumped or pressed into melt under high pressure.

62168. Ruhrchemie Aktiengesellschaft. Process for the production of dithiocarbamates which are chlorinated in the carbon chain. Accepted on 30th August 1958.

Reacting carbon disulphide, in presence of a base, with a salt of amine.

62432. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Process and machine for the continuous production of corrugated laminates of plastic materials. Accepted on 2nd September 1958.

One or more fibrous sheets are passed between 2 impregnation cylinders and 2 sheets of non-porous flexible material unwound from two rolls enclose the laminate-sheets drawn into the polymerisation chamber wherein corrugations are imparted perpendicularly to its advancement.

62439. Hindusthan Antibiotics (Private) Limited. An improved process for the manufacture of N,N'-dibenzylethylene diamine. Accepted on 2nd September 1958.

At least two molecular equivalents of ethylene diamine are reacted with one molecular equivalent of benzyl chloride and the product is fractionated.

62444. Societe des Usines Chimiques Rhone-Poulenc. Process for the production of new indole derivatives. [Addition to No. 59129]. Accepted on 2nd September 1958.

Reacting compound of type of 2-(2-piperidyl)-3-ethylindole with alkylating agent to introduce alkyl or aralkyl group, onto nitrogen of piperidine nucleus.

62474. F. P. Somogyi. Improvements in or relating to the thermal treatment of materials in vertical shaft furnaces. (5th December 1956). Accepted on 29th August 1958.

A solid fuel, an inert material and combustion air fed in required amount as to achieve substantially complete combustion.

62511. Ciba Limited. New acylated $\alpha : \alpha$ -dioxo-diamino-anthraquinones, and their manufacture. Accepted on 2nd September 1958.

An α, α dihydroxy diaminoanthraquinone is heated with formic acid or a halide or anhydride of an aliphatic mono-carboxylic acid.

62515. McKiernan-Terry Corporation. Improvements in compound hammer. Accepted on 3rd September 1958.

Cylinder and piston ram having upper and lower portions of different diameters and provided with opposed annular shoulders forming the portions of different diameters forming with cylinder wall and ram an expansion chamber, a member actuated by ram at the end of downstroke to admit fluid in the expansion chamber, another member actuated at the end of upstroke to transfer some of the fluid from said expansion chamber to the upper cylinder.

62516. McKiernan-Terry Corporation. Improvements in pile hammer having integral built-in surge tank and enclosed protected valve gear. Accepted on 3rd September 1958.

An integral surge chamber extends on one side of the cylinder, the valve mechanism controlling operation of the ram being housed within the said chamber.

62522. Megator Pumps and Compressors Limited. Improvements in fluid pumps, compressors or motors. (13th December 1956). Accepted on 3rd September 1958.

Includes two or more parallel shafts interconnected to revolve in unison in the same direction and each carrying a crank pin or eccentric, the crank pins or eccentrics on adjacent shafts occupying same angular position and coupled by a connecting rod.

62532. Stamicarbon N. V. Installation for the continuous separation of objects according to specific gravity. [Addition to No. 61023]. Accepted on 29th August 1958.

Comprises one rotation symmetrical bed composed of cantilever elements.

62559. Charles Elliott Tapscot Cridland and Edward Albert Corbett. Improvements relating to bib cocks, taps and the like. (30th April 1957). Accepted on 3rd September 1958.

Fluid flow control means in a bib cock, characterised by a hollow cylindrical elements of a resilient deformable plastic material which is axially displaceable for opening and closing purposes.

62622. Heinrich Koppers Gesellschaft mit beschränkter Haftung. Process for the production of valuable gaseous hydrocarbons. Accepted on 29th August 1958.

Initial material is mixed with hot heat carrier flowing at high velocity and the mixture is introduced into a reaction chamber.

62705. "Rheum" Rheinische Werkzeug-und Metallwarenfabrik GmbH. Improvements in and relating to a process and device for screening and filtering moist goods. Accepted on 2nd September 1958.

In which transverse oscillations are generated in a screening web at and near its centre portions and simultaneously longitudinal oscillations are generated partly overlapping the transverse oscillations, toward the end portions of said web.

62761. Sandoz Ltd. Process for the manufacture of new phenothiazine derivatives. (31st October 1957). Accepted on 28th August 1958.

Condensing a phenothiazine derivative with a β -halogen methyl-peperidyl derivative and if desired, converting the base into an acid addition salt.

62910. Metropolitan-Vickers Electrical Company Limited. Improvements in and relating to pantograph current collectors. (22nd January 1957). Accepted on 2nd September 1958.

Pantograph frame constructed with crossed intermediary connected rods arranged between the rotatable lever arms and supporting rods carrying the collector bar.

63218. Standard Telephones and Cables Limited. Improvements in or relating to intelligence storage equipment and to automatic telecommunication exchanges. (12th March 1957). Accepted on 28th August 1958.

Time division multiplex system serves a number of signal sources and provides a number of time division channels.

63238. Johns-Manville Corporation. Apparatus for converting molten raw material into mineral wool. Accepted on 2nd September 1958.

The bight of the rotors and distributor roll at the narrowest point is of a width less than 1/12 the diameter of said rotors and the distributor roll has a maximum diameter smaller than the rotors.

63274. Dr.-Ing. H. Vorkauf. Improved watertube steam boiler. Accepted on 2nd September 1958.

Four downcomer tubes arranged at corners of boiler and interconnected at their ends by headers, with riser tubes disposed between headers, the down-comer tubes constituting supporting structure for riser tubes and connected at their lower ends with water space of drum and at their upper ends with drum at a height near water level to discharge steam and water mixture.

63419. Imperial Chemical Industries Limited. Treatment of leather with polymeric compositions. (29th March 1957). Accepted on 30th August 1958.

Impregnating leather with polyesters or polyesteramides in the presence of poly-functional isocyanates.

63429. Automatic Telephone and Electric Company Limited. Improvements in circuit arrangements employing magnetic cores. (27th March 1957). Accepted on 3rd September 1958.

Each core being provided with an input coil and a transfer coil, the transfer coil on one core being connected to the input coil of the next core by a coupling circuit, a source of stepping pulses being connected to the coupling circuits.

63468. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to semi-conductor barrier layer systems provided with vacuum-tight envelopes and methods for producing such systems. Accepted on 3rd September 1958.

Semi-conductive system is provided within its envelope a depot of water in the bound state.

63591. E. K. Cole Limited. Improvements in or relating to wave-guide components. (3rd April 1957). Accepted on 2nd September 1958.

Of the short-slot hybrid type comprising two adjacent ridged wave guide sections coupled on to a narrow wall by a slot.

63784. E. M. Arthur. Improvements in hose clips of the like. Accepted on 2nd September 1958.

In which the screwed spindle is freely mounted in the housing which is open at one end for receiving the screwed spindle and has an abutment at the other end.

63844. J. Stone & Company (Deptford) Limited. Improvements relating to battery-charging systems. (23rd May 1957). Accepted on 2nd September 1958.

In which a regulator control winding is supplied through rectifiers with voltages varying with the generator alternating voltage and the generator alternating current respectively, the voltage varying with the said current is applied across a lamp resistance and the said winding in series.

64126. D. M. Edwardes. Improvements relating to joints between tubular members. Accepted on 28th August 1958.

In which the socket houses a resilient o-ring, the end of the spigot is tapered to enter and expand the o-ring radially to form a fluid-tight joint.

64382. Slazengers Limited. Improvements in or relating to sports rackets. (14th June 1957). Accepted on 3rd September 1958.

Consist in locating one or more sleeved eyelet elements in each of selected holes in the racket frame for the passage therethrough of the string or strings.

Opposition Proceedings

An opposition has been entered by Montecatini Societe Generale Per L'Industria Mineraria E Chimica, to the grant of a patent on application No. 61344 made by Union Carbide Corporation.

Printed Specification Published

A limited number of printed copies of the undernoted specifications are available for sale from Officer-in-Charge, Government of India, Central Depot, 8, Hastings Street, Calcutta, at two rupees per copy:—

55116. 55135. 55751. 55759. 55779. 55784. 55793. 55794. 55868. 55876. 55887. 55888. 55898. 55962. 56052. 56056. 56139. 56154. 56305. 56402. 56609. 56611. 56714. 56726. 56799. 57380. 57381. 57597. 57778. 57884. 58105. 58114. 58115. 58118. 58169. 58444. 58961. 59095. 59328. 60331.
